ORGANIC

Material: Semi-metallic

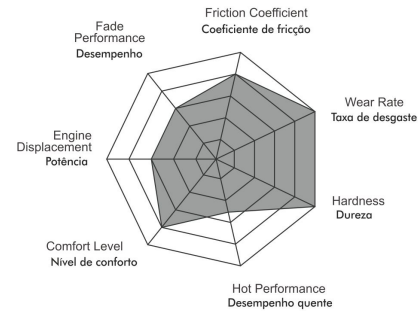

Features: Yongli's basic selection , significantly improved compared with the original brake effect

Application: Scooter,normal motorcycle,electric scooter

Material: Semi-metálico

Características: significativamente melhorado em comparação com o efeito de travagem original

SINTERED

Material: sintered

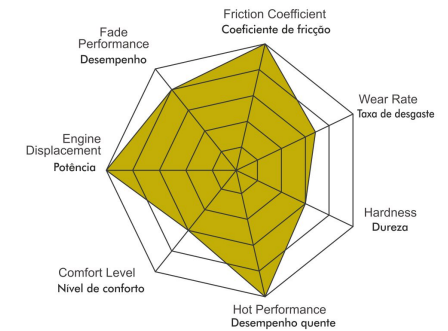

Features: New formula of nickel free and lead free, excellent braking force and low abrasion in extremely high temperature braking environment

Application: Off road, modified motobikes, competitive version bike, large displacement recreational vehicle

Material: Sinterizado

Características: Nova fórmula livre de níquel e chumbo, adaptável a altas temperaturas excelente força de travagem e baixa abrasão em temperatura extremamente alta

KEVLAR COMP

Material: less metallic , including Dupont Kevlar fiber

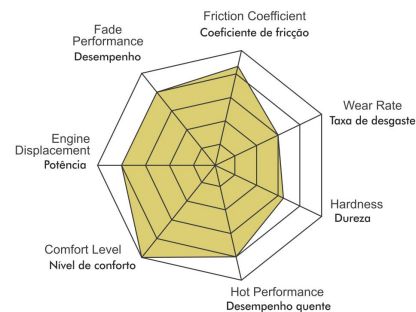

Features: Excellent brake sensitivity, long service life, adapt to high temperature brake environment

Application: Kart, ADV cross-country bike, heavy bike (large displacement), racing bike, modified motobikes

Material: menos metálico, inclui fibra Kevlar Dupont

Características: Excelente sensação travagem, vida útil longa, adaptável a altas temperaturas travagem

QUALITY CONTROL

Raw material test and inspections

Strict control for manufacturing process and product inspections

ISO9001, ISO14001, ISO45001
